

Thank you for showing your confidence in us by purchasing the BEHRINGER SPECTRUM ENHANCER SE200. This miracle box enhances the sound of almost any instrument by emphasizing the instrument's tone spectrum.

1. CONTROLS

Top view

- 1 The *BALANCE* control adjusts the relation between direct and effect signal.
- 2 The *SPECTRUM* control adjusts the center frequency of the range that will be emphasized from 500 Hz to 5 kHz.
- 3 The *ON/BATT* LED illuminates when the effect is activated. It also serves as a battery level indicator.
- 4 Use the footswitch to activate/deactivate the effect.
- 5 Use this 1/4" TS *IN* connector to plug in the instrument cable.
- 6 The 1/4" TS *OUT* connector sends the signal to your amp.

Use the *DC IN* connection to plug in a 9 V power supply (not included).

The *BATTERY COMPARTMENT* is located underneath the pedal cover. To install or replace the 9 V battery (not included), press the hinges with a ballpoint pen and remove the pedal cover. Be careful not to scratch the unit.

 **The SE200 has no on/off switch. As soon as you insert the plug into the IN connector, the SE200 is on. When not in use, remove the plug from the IN connector. This extends the life of the battery.**

The *SERIAL NUMBER* is located at the underside.
