Sound sources

Code

P8083

Range

Tuner - CD - Mp3

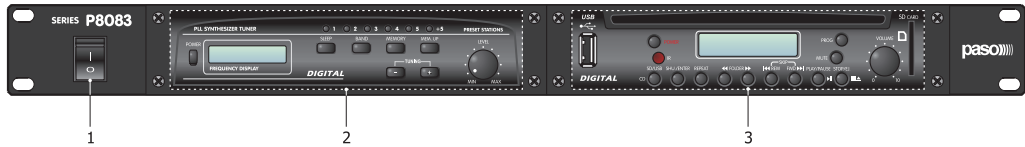

Description

Panel for CD/USB/SD card/Mp3 player - Tuner

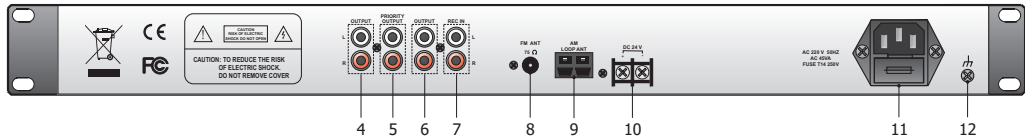

This equipment is a complete sound source system, composed of a digital AM/FM tuner with 20 preset station memories, a shockproof CD Player with the possibility of acquiring data from SD card memories or from external devices with USB and optional FM/AM Antennas. The P8083 has provisions for supplying independent outputs for both a CD player and a tuner. There is also a third combined audio output from which it will be possible to pick up both signals from these sound sources, giving priority to the CD player over the AM/FM tuner. Remote control included in the supply.
