Warning

**For your own safety, please read this user manual carefully
before your initial start-up!**

Unpacking Instructions

Immediately upon receiving this product, carefully unpack the carton and check the contents to ensure that all parts are present, and have been received in good condition. Notify the dealer immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that a fixture must be returned to the factory, it is important that the fixture be returned in the original factory box and packing.

Your shipment includes:

- Odin SF-12A 12" Side Fill
- Power cable **NOT** included
- Network cable **NOT** included
- User manual

CAUTION!
Keep this device away from rain and moisture!
Unplug mains lead before opening the housing!

Safety Instructions

Every person involved with the installation, operation and maintenance of this system has to:

- be qualified
- follow the instructions of this manual

CAUTION! Be careful with your operations.
**With a dangerous voltage you can suffer
a dangerous electric shock when touching the wires!**

Before your initial start-up, please make sure that there is no damage caused by transportation.

Should there be any, consult your dealer and do not use the system.

To maintain perfect condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this manual.

Please consider that damages caused by manual modifications to the system are not subject to warranty.

This system contains no user-serviceable parts. Refer servicing to qualified technicians only.

IMPORTANT!

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the system.

- Always disconnect power from the mains, when system is not used. Only handle the power cord by the plug. Never pull out the plug by tugging the power cord.
- Always operate the unit with the AC ground wire connected to the electrical system ground.
- Avoid flames and do not put close to flammable liquids or gases.
- Avoid ground loops! Always be sure to connect the power amps and the mixing console to the same electrical circuit to ensure the same phase!
- Avoid installing your equipment very near radio or TV sets, mobile phones, etc., as these can cause RF (radio frequency) interference.
- Before changing your grounds around, always turn your amplifiers down.
- Before connecting or disconnecting the power cord, make sure that the ON/OFF switch is in the OFF position.
- Before switching on or off, make sure that the sound system's amplifiers are off or turned down: this will avoid signal peaks, which are annoying and sometimes dangerous (particularly for speaker enclosures).
- Do not connect this device to a dimmer pack.
- Do not drive the inputs with a signal level higher than required to drive the equipment to full output.
- Do not insert objects into air vents.
- Do not open this device. Risk: hazardous radiation exposure.
- Do not switch the system on and off in short intervals, as this would reduce the system's life.
- Extreme frequency boosts in connection with a high input signal level may lead to overdriving your equipment. Should this occur, it is necessary to reduce the input signal level by using the INPUT control.
- For replacement use fuses of same type and rating only.
- If device is dropped or struck, disconnect mains power supply immediately. Have a qualified engineer inspect for safety before operating.
- If the system has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation water might damage your system. Leave the system switched off until it has reached room temperature.
- Make sure that the available voltage is not higher than stated on the rear panel.
- Make sure that the power cord is never crimped or damaged. Check the device and the power cord from time to time.
- Make sure that the signals into the mixer are balanced, otherwise hum could be created.
- Make sure that there is sufficient room on all sides of the system for air circulation.
- Make sure you do not use the wrong kind of cables or defective cables.
- Make sure you use DI boxes to balance unbalanced signals; All incoming signals should be clear.
- Never let the power cord come into contact with other cables! Handle the power cord and all connections with the mains with particular caution!
- Never remove warning or informative labels from the unit.
- Never use anything to cover the ground contact.
- Only use device indoors, avoid contact with water or other liquids.
- Please turn off the power switch, when changing the power cord or signal cable, or select the input mode switch.
- Prevent distortion! Make sure that all components connected to the Odin have sufficient power ratings. Otherwise distortion will be generated because the components are operated at their limits.
- Repairs, servicing and electric connection must be carried out by a qualified technician.
- Sometimes, when you want to send one signal to more than one amplifier, you should use a signal distributor.
- The best way (even if not always feasible) to avoid ground loops is to connect the electric ground of all the equipment to a single central point ("star" system). In this case, the central point can be the mixer.
- To avoid or solve hum and buzzing troubles, try different combinations of lifting grounds on units that are supplied with ground lift switches or make sure all chassis are connected to earth ground, either through the A.C. power cord ground or by the front panel rack mount screws.

- To emphasize a frequency range, you do not necessarily have to move its respective slider upwards; instead, try lowering surrounding frequency ranges. This way, you avoid causing the next piece of equipment in your sound path to overdrive. You also preserve valuable dynamic reserve ("headroom").
- When connecting the other parts of your sound system, watch out for the so-called "ground loops".
- WARRANTY: Till one year after date of purchase.

Connection with the mains

Connect the device to the mains with the power-plug.

Always pay attention, that the right color cable is connected to the right place.

| International | EU Cable | UK Cable | US Cable | Pin |
|---|--------------|----------|---------------|-------------------|
| L | BROWN | RED | YELLOW/COPPER | PHASE |
| N | BLUE | BLACK | SILVER | NEUTRAL |
|  | YELLOW/GREEN | GREEN | GREEN | PROTECTIVE GROUND |

Make sure that the device is always connected properly to the earth!

Improper installation can cause serious damage to people and property!

Return Procedure

Returned merchandise must be sent prepaid and in the original packing, call tags will not be issued. Package must be clearly labeled with a Return Authorization Number (RMA number). Products returned without an RMA number will be refused. Highlite will not accept the returned goods or any responsibility. Call Highlite 0031-455667723 or mail offersales@highlite.com and request an RMA prior to shipping the fixture. Be prepared to provide the model number, serial number and a brief description of the cause for the return. Be sure to properly pack fixture, any shipping damage resulting from inadequate packaging is the customer's responsibility. Highlite reserves the right to use its own discretion to repair or replace product(s). As a suggestion, proper UPS packing or double-boxing is always a safe method to use.

Note: If you are given an RMA number, please include the following information on a piece of paper inside the box:

- 01) Your name
- 02) Your address
- 03) Your phone number
- 04) A brief description of the symptoms

Claims

The client has the obligation to check the delivered goods immediately upon delivery for any shortcomings and/or visible defects, or perform this check after our announcement that the goods are at their disposal. Damage incurred in shipping is the responsibility of the shipper; therefore the damage must be reported to the carrier upon receipt of merchandise.

It is the customer's responsibility to notify and submit claims with the shipper in the event that a fixture is damaged due to shipping. Transportation damage has to be reported to us within one day after receipt of the delivery.

Any return shipment has to be made post-paid at all times. Return shipments must be accompanied with a letter defining the reason for return shipment. Non-prepaid return shipments will be refused, unless otherwise agreed in writing.

Complaints against us must be made known in writing or by fax within 10 working days after receipt of the invoice. After this period complaints will not be handled anymore.

Complaints will only then be considered if the client has so far complied with all parts of the agreement, regardless of the agreement of which the obligation is resulting.

Description of the device

Features

The Odin SF-12A is a 2-way full-range active bi-amped speaker. It is equipped with Celestion speakers and a sturdy, road-ready design. With these units, the sound engineer can provide a more developed and well-balanced sound on stage. Through separate stage monitors, each band-member receives his own personal mix. Placing the Side Fills around the stage, preferably in an X-Stage setting, allows each performer to hear exactly what is going on with all the other instruments on stage. This gives the sound engineer more freedom and gives the possibility of designing larger stage setups.

- System: 2-way full range cabinet
- Power supply: 100–240 V AC, 50/60 Hz
- Power consumption: 700 W
- AMP power: 800 W Continuous, Bi-AMP(Class D-350 W LF, Class AB-130 W HF), 3200 W Peak
- Speaker: 1" Celestion Compression Driver; 1,75" Voice Coil; 60 W RMS/240 W Peak
12" Celestion Woofer, Water Resistant Coating, 3" Voice Coil, 350 W RMS/1400 W Peak
- Frequency response (+/-3 dB): 60 Hz–19 kHz
- MAX SPL @ 1 m: 128 dB
- Crossover frequency: 1,6 kHz
- Dispersion (-6 dB): 80° Horizontal/60° Vertical (Rotatable Horn)
- Cooling: Passive cooling + forced cooling inside
- Audio connector: 3-pin XLR connector IN/OUT
- Data connector: RJ45 Data IN/LINK cascading connector
- External control: 9 fixed presets + 1 editable preset, power switch with LED indicators for CLIP/SIG/PROT
- DSP processor: 32 bit, 24 bit/48 kHz audio conversion AD/DA
- Electronic protections: Thermal/Convection Fan/Overload/Digital Limiter/Compressor
- Mains connector: Neutrik PowerCON connector IN/OUT
- Enclosure construction: 15 mm birch plywood, resistant black paint, 1,5T metal grill with foam, one handle on each side, water resistant coating
- Pole mount: 36 mm
- Threaded eye bolts: M10
- Fuse: T6,3AL/250V
- Dimensions: 380 x 395 x 655 mm (LxWxH)
- Weight: 23,62 kg

Power cable and network cable are NOT included

Optional accessories:

[D7226](#) – DAP Case for 2 x ODIN SF-12A

[D3915](#) – ODIN CL-4 Connect

[90527](#) – Neutrik PowerCON to Schuko power cable (1,5 m)

Overview

Fig. 01

Backside

Fig. 02

- ① **3-pin XLR audio connector LINK**
Connected in parallel with the XLR input (02). Use the connector to send an audio signal to another active speaker.
- ② **3-pin XLR audio connector IN**
Balanced XLR line level input connector.
- ③ **RJ45 data connector IN**
RJ45 data input connector.
- ④ **RJ45 data connector LINK**
RJ45 data output connector for cascading connections.
- ⑤ **10-position preset selector**
Turn the selector to choose one of the 10 equalizer presets. See page 11 for more information.
- ⑥ **Power switch ON/OFF**
- ⑦ **PowerCON 100–240 V AC power connector LINK (Gray)**
This output is connected in parallel with the PowerCON input and can be used for powering another active speaker.
- ⑧ **Fuse T6,3AL/250V**
- ⑨ **PowerCON 100–240 V AC power connector IN (Blue)**
Connect to an appropriate power supply.
- ⑩ **Cooling fan**
- ⑪ **LED indicators SIG/CLIP/PROT/POWER/ACTIVE**
The indicators light up to indicate the status of the input signal.

Installation

Remove all packing materials from the Odin SF-12A 12" Side Fill. Check if all foam and plastic padding is removed. Connect all cables.

Do not supply power before the whole system is set up and connected properly.

Always disconnect from electric mains power supply before cleaning or servicing.

Damages caused by non-observance are not subject to warranty.

Pole Mount

It is possible to mount the SF-12A by means of a pole mount, either in an upright or tilted position.

Fig. 03

Flying Speaker

- 01) Loosen and remove the 3 socket screws (Fig. 04).
- 02) Insert and tighten 3 **threaded M10 eye bolts** (Fig. 05).

Fig. 04

Fig. 05

- 03) Install the speaker (Fig. 06). Please follow the European and national guidelines concerning rigging, trussing and all other safety issues. Do not attempt the installation yourself! Always let the installation be carried out by an authorized dealer!

Fig. 06

Connection Examples

Make your initial connections with all the equipment powered off and ensure that all the main volume controls are turned completely to the minimum. See Fig. 07–09 for more information, pages 9–10.

Setup and Operation

Follow the directions below, as they pertain to your preferred operation mode.

Before plugging the unit in, always make sure that the power supply matches the product specification voltage. Do not attempt to operate a 115V specification product on 230V power, or vice versa.

Preset Selector

01) Turn the preset selector **(05)** to choose one of the 10 presets. See below for more information.

Presets

The below presets can be selected according to the preferences of the end user. Each preset consists of a set of properties, unique for every purpose and location. The presets differ by the EQ, Gain and Delay settings.

| PRESET | NAME | DESCRIPTION |
|--------|-------------------|---|
| 0 | Live (EQ flat) | Preset for multipurpose use, Fully mimics the Odin T-8A in full range, to ensure a perfect blend with a full set. |
| 1 | Live Hi-pass | Preset for multipurpose use, Fully mimics the Odin T-8A with an active hi-pass filter, to ensure a perfect blend with a full set. |
| 2 | DJ | Preset for entertainment use (DJ/Playback) more bright and loudness maximized sound, set at a level of -3 dB. |
| 3 | DJ Hi-pass | Preset for entertainment use (DJ/Playback) more bright and loudness maximized sound, set at a level of -6 dB. |
| 4 | Presenter | Preset for presenter use (Conventions/Presenters) more present sound in the voice range, set at a level of -3 dB. |
| 5 | Presenter Hi-pass | Preset for presenter use (Conventions/Presenters) more present sound in the voice range, set at a level of -6 dB. |
| 6 | Vocal Wedge | Preset with optimized frequency response to be used as a personal monitor, minimizing feedback. |
| 7 | Drum/Bass Wedge | Preset with powerful direct sound and boosted low end. |
| 8 | Outdoor Odin | Preset for open air use, more direct sound in the Mid/Hi-Mid, set at a level of 0 dB. |
| 9 | ODIN Editor | Default settings, configurable with the ODIN Editor. |

Connection Cables

Take care of your cables, always holding them by the connectors and avoiding knots and twists when coiling them: This gives the advantage of increasing their life and reliability.

Periodically check your cables. A great number of problems (faulty contacts, ground hum, discharges, etc.) are caused entirely by using unsuitable or faulty cables.

For these applications the unit provides XLR and CAT-5 connectors to easily interface with most professional audio devices. Follow the configuration examples below for your particular connection.

How to Make a Data Cable

A standard ETHERNET cable can be used to replace the data cable required to transmit data.

Please follow the instructions below in order to create an extra net cable.

Take a standard net cable (CAT-5/ 5E /6) and connect it to the RJ45 connector, as shown in the picture below (Fig. 10). The wires should now be colored as follows:

Fig. 10

Maintenance

The Odin SF-12A 12" Side Fill requires almost no maintenance. However, you should keep the unit clean. Disconnect the mains power supply, and then wipe the cover with a damp cloth. Do not immerse in liquid. Do not use alcohol or solvents.

Keep connections clean. Disconnect electric power, and then wipe the connections with a damp cloth. Make sure connections are thoroughly dry before linking equipment or supplying electric power.

Troubleshooting

This troubleshooting guide is meant to help solve simple problems. If a problem occurs, carry out the steps below in sequence until a solution is found. Once the unit operates properly, do not carry out following steps.

- 01) If the device does not operate properly, unplug the device.
- 02) Check the fuse, power from the wall, all cables, etc.
- 03) If all of the above appears to be O.K., plug the unit in again.
- 04) If you are unable to determine the cause of the problem, do not open the device, as this may damage the unit and the warranty will become void.
- 05) Return the device to your DAP Audio dealer.
